

AUTONOMIES in Liégé, Belgium March 16th -18th 2006

The Autonomie exhibition is held every second year in Liégé. Last time 2004 the exhibition had 5500 visitors. Liège is located in the French speaking part of Belgium, and attracts therefore mostly the French speaking population. Seven companies exhibited car adaptation products in the show:

Peeters Mobility Center showed the car seat lift Turny with the transport wheelchair Carony 24 with a low built BEV seat. They also exhibited a Turnout with a Carony 12 with BEV seat, and also the Care Belt system.

A model showing the Care belt system which is a harness system that is used for support and prevents the person from falling forwards or to the side.

The company AB Motors showed a Turny 300 with original seat front right in a Voyager, and also a Carolift 570 installed in the trunk of a Chrysler.

ACA Belgium also showed Autoadapt products: a Turny 300, a Turnout with a Recaro seat and a Carony 12 with BEV seat.
