

October 2005

Senior 55+ in Lilleström, Norway

This exhibition was held for the first time in Norway in Lilleström, outside Oslo, from 30:th of September to the 2:nd of October. It was directed entirely to elderly citizens, and was very successful. Over 4000 people attended the exhibition. Autoadapt attended the Senior 55+ to inform and present the variety of Autoadapt car adaptation products.

Autoadapt was represented by the company Handi-Norge A/S. They displayed a Carospeed Hand control on the driver's side, a Carony 24" plus Carony 12" in combination with a Turny Orbit on the front passenger side in a Renault Kangoo.

Many visitors took the chance to try the transport wheelchair Carony. A common opinion was that Carony was a clever solution to the problem of transfer to and from the vehicle. Another common comment from the visitors was that even if they had no need for the Carony at the moment, they had a friend, a neighbour or a relative that was in need of such a product. There was a great demand for brochures which was something that Handi-Norge had anticipated/hoped for!

Dag Frode Wold from Handi-Norge talks about the benefits of the Carony transport wheelchair to a group of elderly.

Senior 55+, Lilleström, Norway

Jonas Andersson from Autoadapt and Dag Frode Wold show a visitor how to do a transfer from the Carony wheelchair to the car seat lift Turny.
