TURNIN®

The swivel base that turns the seat inwards

Suitable for MPV's and minibuses

Turnin is a swivel base that turns the seat inwards in the vehicle. It is designed for MPV's and minibuses and makes it possible to transfer from wheelchair to driver seat.

The wheelchair occupant drives into the car, via ramp or lift, and secures the wheelchair in the floor anchorage.

Operated with a hand control

Turnin is electrically operated with a hand control. The turning movement is interrupted as soon as the control button is released, which gives the user time to move the legs, without any rush. The seat lengthwise adjustment is made manually.

Crash tested

Turnin is crash tested and fulfils the demands from current rules and regulations. Turnin is CE marked.

1. Enter the vehicle by lift or ramp. Secure the wheelchair.

2. Use the hand control to turn the seat inwards. Make your transfer.

3. Turn the seat to driving position. Ready to drive off.
